SMARTLOCK AI

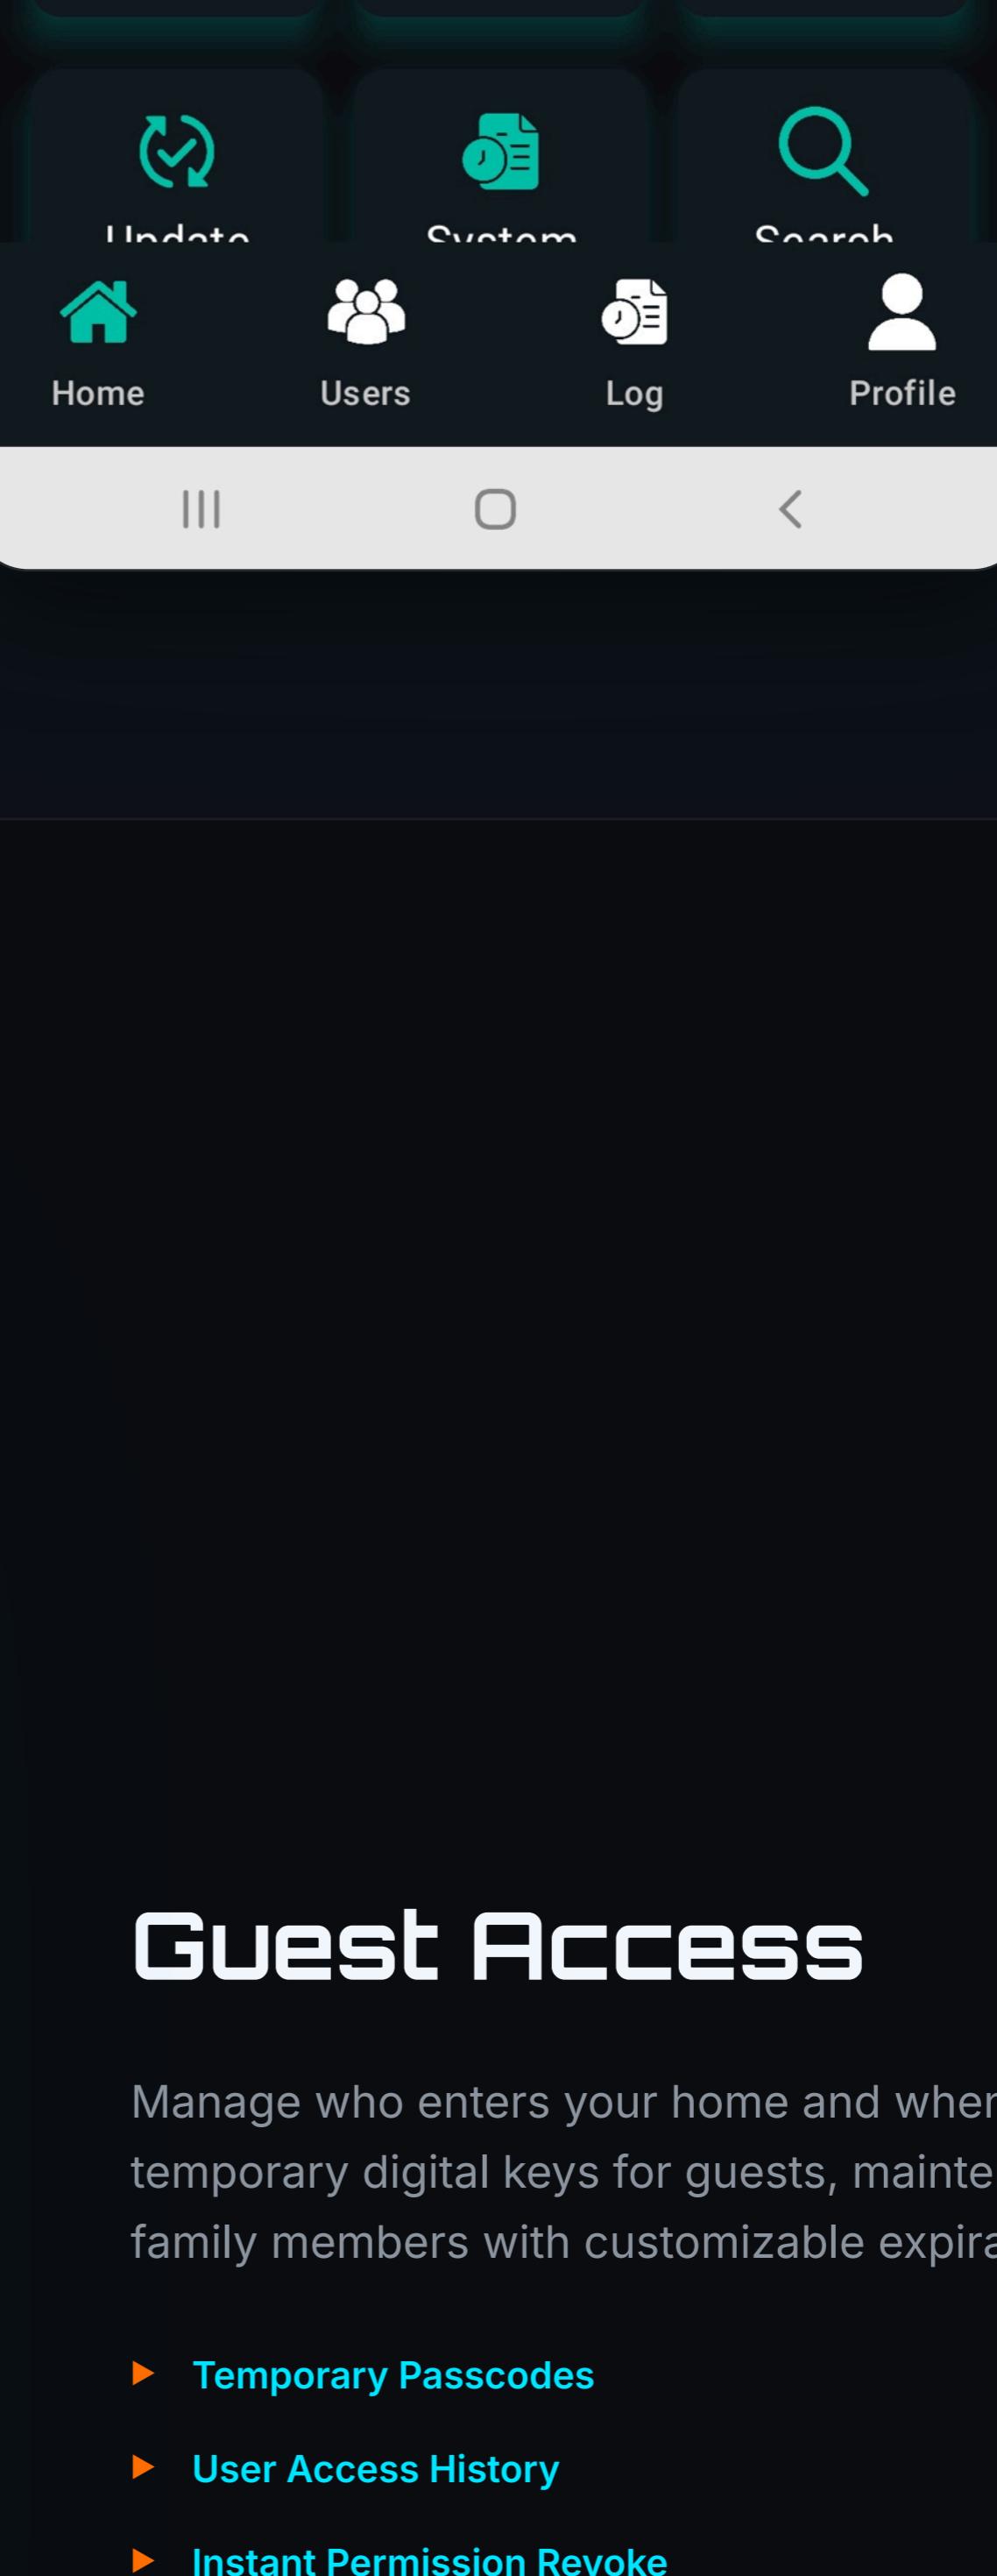

The Future of Residential Security & Keyless Entry

Intelligent Entry

A sophisticated entry point that initializes the AI security protocols. The app connects instantly to your home mesh network to provide real-time control.

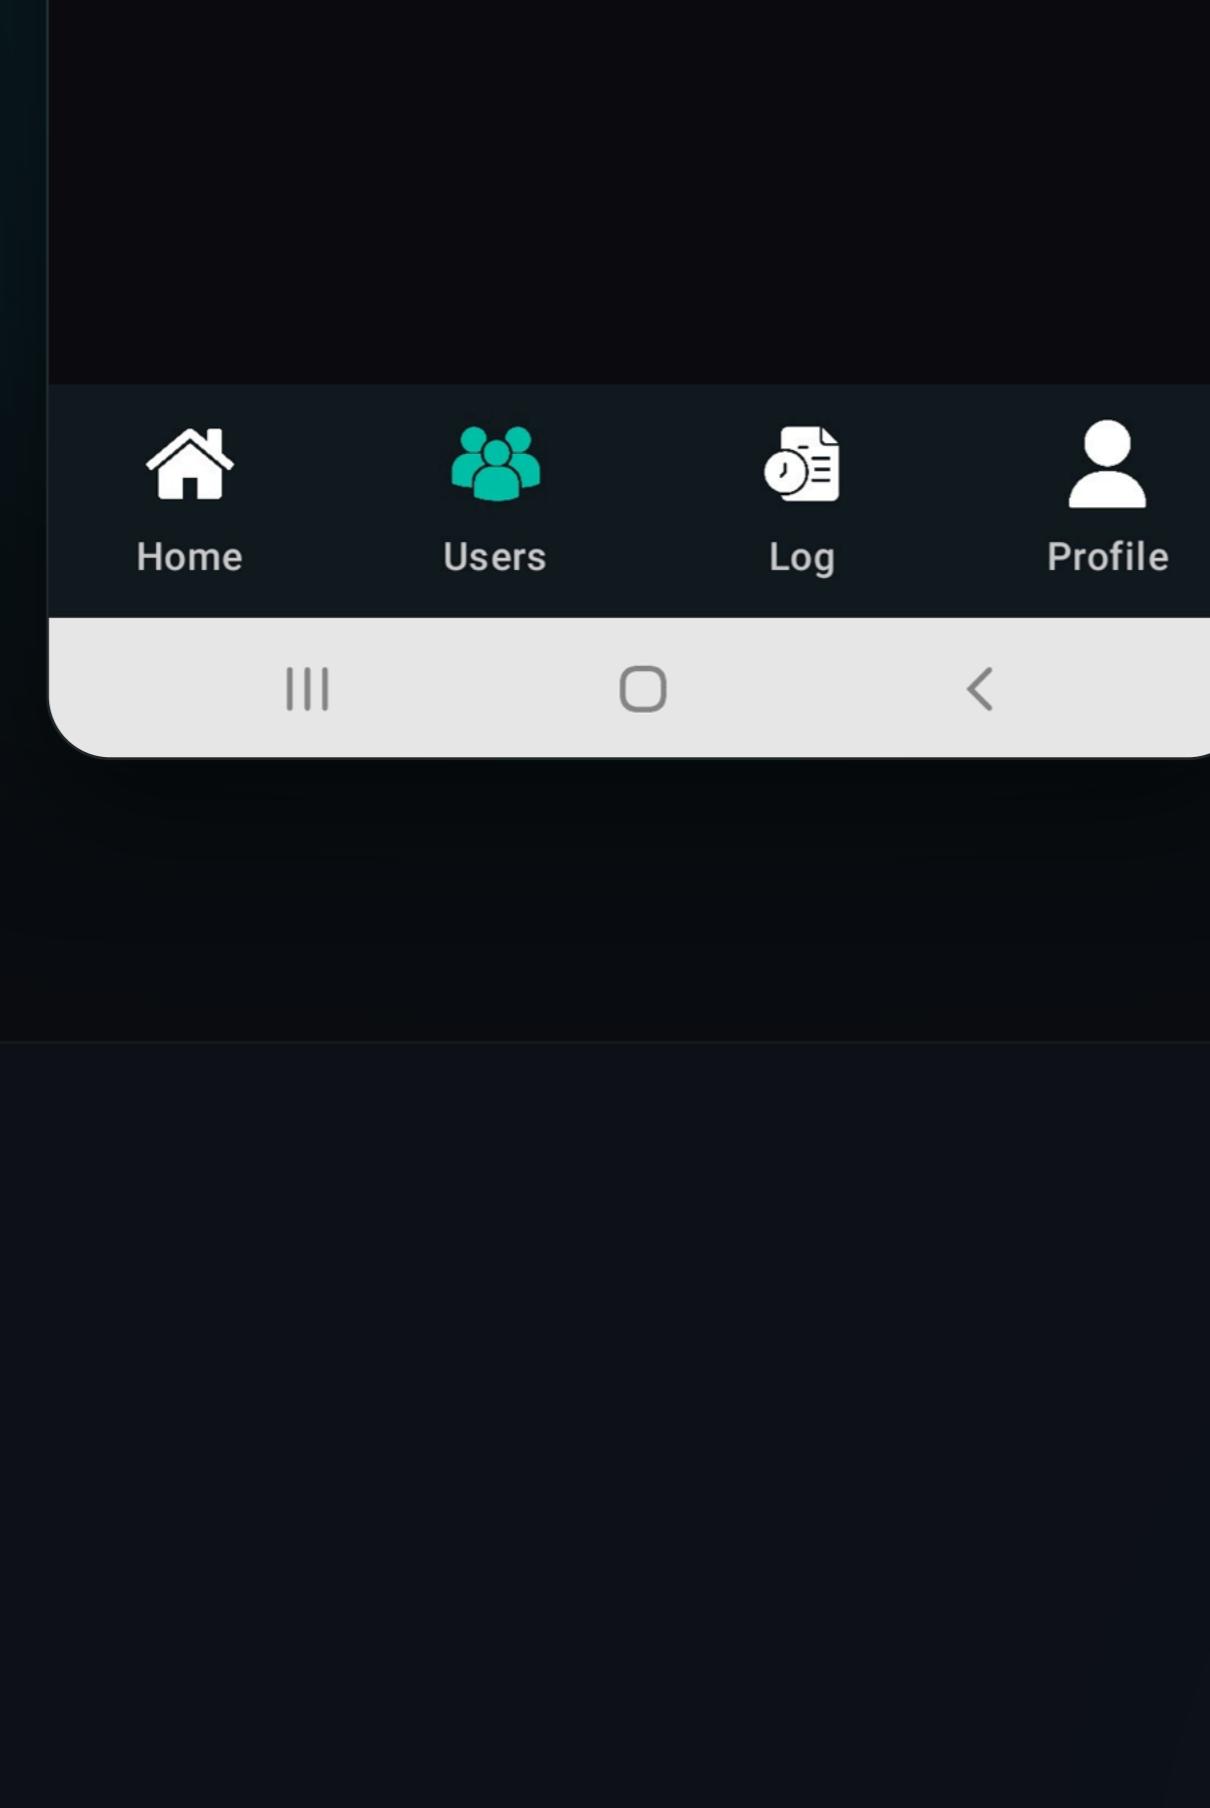

- Biometric Verification Sync
- End-to-End Encryption
- Fast Cloud Initialization

Total Control

The central hub for your smart home security. One-tap locking and unlocking with a visual status indicator that ensures you never have to wonder if the door is shut.

- Real-time Lock Status
- Remote Toggle Access
- Battery Level Monitoring

Guest Access

Manage who enters your home and when. Generate temporary digital keys for guests, maintenance workers, or family members with customizable expiration times.

- Temporary Passcodes
- User Access History
- Instant Permission Revoke

Activity Timeline

Review every entry and exit with detailed timestamps. SmartLock AI categorizes events so you can see exactly when the front door was accessed and by whom.

- Detailed Event Logging
- Intrusion Alerts
- Automatic Backup
